Following approval of the [SAICM Programme of Work for the period 2021-2023](#), the SAICM Secretariat initiated a process to explore options to develop a capacity-building strategy that will support the implementation of the new framework instrument. As a result, participants at ICCM5 will have before them two information documents ([SAICM/ICCM.5/INF/3](#) and [SAICM/ICCM.5/INF/5](#)) which aim to inform discussion on the issue of capacity-building at ICCM5, and support the development of such a strategy following adoption of the new framework instrument.

In addition, it is understood that implementation of the new framework instrument will benefit from some form of reporting mechanism to track the achievement of any newly established strategic objectives, targets, indicators and/or milestones. This would build on existing experience under SAICM and learn lessons for other international agreements and processes. To inform discussion on the issue of reporting at ICCM5, and support development of reporting approaches following the adoption of the new framework instrument, [SAICM/ICCM.5/INF/4](#) has been prepared.

Discussion Questions

Q1	How can diverse stakeholders from various sectors, including intergovernmental organizations, non-governmental organizations, and individuals involved in the sound management of chemicals, be more effectively engaged in the development and implementation of a capacity-building strategy for the new framework instrument? What types of roles should each stakeholder play in the development and implementation of the new framework instrument?
Q2	Reflecting on the draft elements for a capacity-building strategy for the Beyond 2020 Framework Instrument, what additions or modifications would you suggest? What do you see

	as the key components that should be present in a successful capacity-building strategy for the new framework instrument?
Q3	As we consider the adoption of a new framework instrument for chemicals and waste management during ICCM5, what steps can we take to help ensure effective review of implementation in the future at both national and international levels? Such review is essential for understanding progress and identifying what else needs to be done to enhance progress. How can we encourage development of an approach to monitoring, reporting and review at all levels and engaging all stakeholders that leads to improvements in implementation?

Presenters

Jerry Harrison, Principal Technical Specialist, United Nations Environment Programme World Conservation Monitoring Centre (UNEP-WCMC)

Jerry provides input and guidance to UNEP-WCMC's extensive work in support of intergovernmental agreements and processes relating to biodiversity, in particular the Convention on Biological Diversity (CBD) and the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES). However, Jerry has also been working to promote cooperation and synergies in implementing international agreements and processes at both national and international levels, and this has included working not only within the biodiversity sector but on the intersection between biodiversity and chemicals and waste.

Marina Demaria Venâncio, Programme Officer, United Nations Environment Programme World Conservation Monitoring Centre (UNEP-WCMC)

Drawing on a background in environmental law and governance, Marina supports two areas of work within UNEP-WCMC's portfolio: international policy and conventions; and nature, gender, and human rights. This work includes engaging with national governments, intergovernmental agencies, and other stakeholders in the context of global biodiversity processes and conventions. Marina also leads and makes substantive contributions to projects supporting governments in developing and implementing national, regional, and global biodiversity policies. She is a member of the Steering Committee of the IUCN World Commission on Environmental Law, and has previously worked with UNEP and FAO.

Facilitator

Pierre Quiblier, Officer in Charge, SAICM Secretariat, Chemical and Health Branch, UN Environment Programme

Pierre Quiblier is SAICM Secretariat Coordinator OIC at the Chemical and Health Branch of the United Nations Environment Programme since January 2023. As such he led the organization of the resumed 4th meeting of intersessional process for Strategic Approach and the sound management of chemicals and waste beyond 2020 (IP4.2) held in Nairobi on 27 February - 3 March 2023.

Within the UNEP Chemicals and Health Branch as Programme Officer, he developed in 2006 the UNEP-UNDP Partnership Initiative on the mainstreaming of sound management of chemicals into development plans and policies. He managed and coordinated the UNEP global publication of the Global Chemicals Outlook: Towards Sound Management of chemicals. He also ensures liaison with WHO and undertake related environment and health functions in view of strengthening the cooperation in areas of common interest. He led the development and organization, of the first inter-Ministerial Health and Environment Conference in Africa held in Libreville, Gabon, 2008 and the 2nd Conference held in Luanda, Angola, 2010, as well as the 3rd Conference held in Libreville Gabon, 2018. He developed and contributed to the implementation of the GEF financed ChemObs project. A prototype in nine African countries of national integrated health and environment observatories to provide timely and evidence-based information to better predict, prevent and reduce chemicals risk to human health and the environment. Pierre Quiblier graduated with a Master of Business Administration degree from Fordham University, New York. He also post-graduated with a DEA in political studies and graduated with a Master's degree and post-graduation degree in Political Sciences from the University of Grenoble, France.
